This robust machine measures the length of wire and other materials from 0.5mm (.0197) up to 15mm (.59in) diameter.

The machine is equipped with two adjustable tension springs, mounted externally, which can be unhooked from their anchor. This allows the measuring head to be pivoted up to a backstop to facilitate threading the cable through the machine. If a shaft encoder is fitted, the output can be directed to any type of counter with an electronic input.

**Key Features**

- Continuous operation at up to 25 metres/sec (82 ft/sec) or 50 counts per second.
- Self lubricating bearings on both rollers.
- Heavy duty cast aluminium structure.
- Hardened steel inlet and outlet guides.
- Polyurethane covered measuring wheel fitted as standard.
- Can be interfaced to a data processing system.
- Totalising or predetermining counters available or encoder to pulse electronic counters.
- Additional counter or encoder can be fitted to keep a total while the main counter is reset.

**Applications**

- Batching of wire from production for distribution on reels
- Field use in cable laying operations
- Cable TV installation (co-axial or fibre optic)
- Retail dispensing of short lengths (less than a full reel)

**Length Measuring Ordering Information**

To order a 2630 Cable & Wire Measuring Machine select unit of measurement and material travel.

**Unit of measurement** (Select and add code to 2630-132?)
- C Metres/Centimetres
- F Feet and Inches

**Material travel** (Select and add code to 2630-132X?)
- A for material travelling towards the operator
- B for material travelling away from the operator

_e.g. 2630-132CA = Cable & wire measurer displaying in metres/centimetres, material travelling towards the operator_
