# AURA ADVANCED INSTRUCTIONS:
DISTANCE RANGE SETTING

Two units are required to perform distance range setting: a **TEACHER** and a **STUDENT**. To set a unit as a TEACHER, the unit must be connected via the USB and any other TEACHER or STUDENT unit must be out of range.

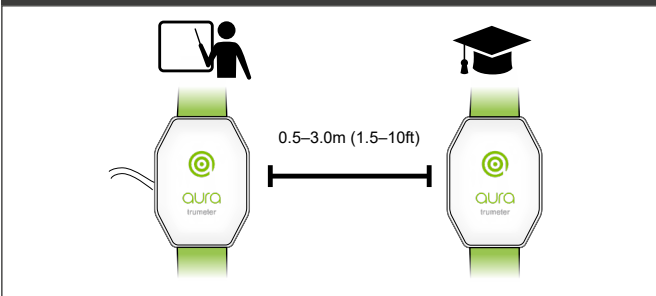

To set as TEACHER: While the unit is charging via USB, PRESS and HOLD button for 10 seconds. *N.B. TEACHER does not learn the new distance it is teaching*.

10 SECS

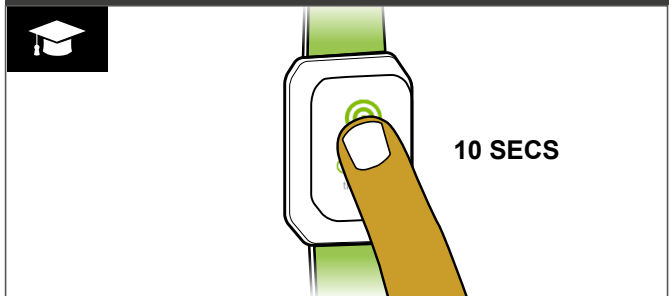

When in TEACHER mode the LED lights solid blue. *N.B. there cannot be more than one TEACHER active in the vicinity.*

BLUE

Place the STUDENT the required alert distance away from the TEACHER (between 0.5–3.0 meters/1.5–10 feet).

0.5–3.0m (1.5–10ft)

To set a STUDENT: While the unit is in Normal mode PRESS and HOLD button for 10 seconds. STUDENT must NOT be indicating low battery.

10 SECS

If a TEACHER is in range the unit will go into STUDENT mode and flash the blue LED quickly. The STUDENT is now learning the alert distance.

BLUE

When the alert distance is set the blue LED will return to flashing slowly and the unit is now ready to use at the new alert distance.

BLUE

If a STUDENT fails to "learn" it will flash red quickly instead of blue.

✓ BLUE   ✗ RED

To exit TEACHER Mode, unplug the USB cable.
